

ATAS International, Inc.

Corra-Lok

ATAS introduces Corra-Lok™, the new concealed fastener corrugated panel. Finally, the beauty of a corrugated line without the unsightly fasteners! Corra-Lok™ panels have a positive panel-to-panel interlock with Metafor and the Multi-Purpose System for the ability to create interesting patterns and breaks. The hook and pull design allows for quick and easy installation, while the fasteners are hidden by the consecutive panel.

Corra-Lok is a 16-5/8" wide by 7/8" deep structural panel that provides dramatic shadow lines with its 2-3/4" wide corrugations. Typical applications include walls, equipment screens, mansards and roofing. The system utilizes concealed fasteners to offer uninterrupted vertical or horizontal sight lines.
