3. PRODUCT DESCRIPTION
Basic Uses:
PC panels may be batten style or standing seam. This is a two piece system where the seam is snapped over the clips and fasteners. Uses include roofs, mansards and equipment screens. The PC panels are not structural panels and must be applied to a solid substrate.

Composition & Materials:
Standard Offerings: Panels are roll-formed from .032 or .040 aluminum or 24 gauge metallic coated steel.
Special Offerings: 22 gauge metallic coated steel and 16 oz. copper may be specified, subject to minimum quantities and lead time.

Sizes and Profiles:
PC Batten Style panels are available in 1" (PCB001) and 2" (PCB002) heights. The Standing Seam (PCS114) is 1" high. Three different pan widths may be specified: 11 1/4" (PCP110), 12 2/8" (PCP120) and 15 1/4" (PCP150). Custom width and tapered panels are available. PCX114 Convex Standing Seam panels and PCV114 Concave Standing Seam panels are 1" high. PCX114 Convex has a minimum radius of 2'-9" and the PCV114 Concave has a minimum radius of 4'. Panel lengths are cut to customer specifications, with a minimum of 2' for curved and maximum to transportation limits and/or product and project design considerations.

Colors & Finishes:
A choice of over 40 stock colors is available in a 70% PVDF finish. Anodized finish is available in Clear Satin or Dark Bronze. Texture may be smooth or embossed.
