THE APPLICATIONS ARE ENDLESS...

From a functional and aesthetically pleasing linear ceiling system, to a wide variety of attractive wall panel options, a building’s interior can benefit from the beauty and durability of metal. Curved, tapered, texture, color and custom capabilities expand your options and bring design ideas to life. Acoustical sound control systems available for ceilings and walls, with NRC ratings of up to 0.95. Here are just some of the typical examples of ATAS profiles that can be used in interior applications.

CORRUGATED PANEL

The Corrugated Panel is a traditional wall panel. It is installed horizontally or vertically with exposed fasteners. The panel is available in smooth or stucco embossed texture, depending on material. | www.atan.com/corrugatedpanel

LINEAR CEILING™

The Linear Ceiling system is available in two distinct profiles: round edge or a box style with or without filler strips. Each profile has a choice of two widths that are interchangeable due to the 4” increments of the carrier system. The two ceiling widths provide coverages of 4” and 8”. | www.atan.com/linear ceiling

METAFO R™

Metafor is a structural panel with a ribbed appearance and a concealed fastening system. The architectural ribbed panel has 4-up, 4-down ribs across its 12’ coverage. The texture of the panel is either smooth or stucco embossed. Metafor may be installed horizontally or vertically. | www.atan.com/metafor

CURVED CORRUGATED PANEL

This panel has 37¾” wide coverage and can be installed horizontally or vertically. Convex and concave styles are crimp or stretch curved. Vertical styles are simple wrap-arounds, overlapping or nesting at sides. Contact ATAS for horizontal curving applications. | www.atan.com/curvedcorrugatedpanel

OPALINE™

The Opaline panel is a structural panel that can be installed on open framing and spans up to 2'-6” on center. It can also be applied to a solid substrate, as well. It installs as a basic tongue and groove system with mechanical fasteners. The fasteners are hidden by the adjacent panel. Panels are available with smooth or stucco embossed texture. | www.atan.com/opaline
**GATEN SERIES™**
Gaten Series perforated panels are available in six standard hole size patterns, as well as custom options to fit any project’s design needs. In a wide variety of ATAS panel styles, these perforated panels are often used in sound dampening applications. | [www.atas.com/gaten](http://www.atas.com/gaten)

**CASTLETOP® SHINGLE**
CastleTop is a diamond-shaped flat metal shingle for a unique appearance. Different colors may be combined to create interesting patterns. CastleTop may be used for commercial or residential wall applications. | [www.atas.com/castletopwa ls](http://www.atas.com/castletopwa ls)

**VERSALOK™**
Versa-Lok, a flat shingle style wall panel, creates classic rectangular shapes with its versatile mix-and-match sizes. | [www.atas.com/versalok](http://www.atas.com/versalok)

**BELVEDERE® 7.2” RIB**
Belvedere 7.2” Rib wall panels are structural in nature and can be installed either on solid substrate or open framing. It offers design freedom for all types of buildings. This panel can be installed vertically or horizontally with exposed fasteners. | [www.atas.com/belvedererib](http://www.atas.com/belvedererib)

**CORRA-LOK™**
Corra-Lok is a concealed fastener corrugated metal panel with the beauty of a traditional corrugated line without utilizing exposed fasteners. Corra-Lok panels have a positive panel-to-panel interlock and can be combined with other systems for the ability to create interesting patterns and breaks. | [www.atas.com/corralnk](http://www.atas.com/corralnk)

**CRIMP-CURVING**
Expand your design options with our unique crimp-curving process. Learn more at: [www.atas.com/crvedseries](http://www.atas.com/crvedseries)
