Apply to clean and dry-to-the-touch “as new” substrates, no additional preparation is required.

Spans substrate joint gaps up to ½” (12.7 mm), eliminates need for tapes and fillers.

Phase construction ready, installs in below freezing temperatures, sustains up to 180 days of UV and climate exposure prior to roof system installation. Best practice always recommends coverage as soon as possible.

Emits zero VOCs ensuring crew safety and a healthy building.

Compatible Substrates

- Gypsum/Fiber Roof Sheathing Boards
- Rigid Insulation
- Concrete
- Plywood
- Cross Laminated Timber (CLT)
- Nail Laminated Timber (NLT)
- Dowel Laminated Timber (DLT)
- Pre-painted Steel
- Galvanized Metal
- Aluminum (Painted/Mill Finish)
- For OSB and OSB factory-coated products contact VaproShield Technical.

Roofing System Compatibility

- Metal Roofing
- Slate/Clay Tile with batten/counter-batten substructure
- Cedar Shingles/Shakes with VaproMat™

Contact VaproShield Technical if you have any additional substrate or roofing system questions.

Technical Data & Environmental

Tested to industry standards for vapor permeable roofing

CEDAR SHINGLES/SHAKES WITH VAPROMAT™ DRAINAGE MATRIX

Complete Roof and Wall System

WATER-RESISTANT AND VAPOR PERMEABLE AIR BARRIER ROOF UNDERLAYMENT: SLOPESHIELD PLUS SELF-ADHERED

SLOPEFLASHING

WRB/VAPOUR PERMEABLE AIR BARRIER WALL MEMBRANE

VAPROMAT™ DRAINAGE MATRIX

Required Accessories

A) FLASHING OPTIONS
Self-adhered air barrier flashing shall be SlopeFlashing™ for eaves, hips, ridges, and valleys.

B) BUILDING ENVELOPE SYSTEM
Self-Adhered WRB/Air Barrier Wall Membrane shall be: WrapShield SA Self Adhered or RevealShield SA Self Adhered for open joint cladding. View corresponding Product Data Sheets for in-depth information.

C) VAPROMAT™
Hydrophobic filter fabric with polypropylene drainage matrix, installs over SlopeShield Plus Self-Adhered roof underlayment, available in two depths: 3mm, 7mm. View corresponding VaproMat Product Data Sheet for in-depth information.

D) VAPROSHIM SA™
Simple, cost effective neoprene/EPDM accessory, creates a rain screen drainage plane and air/water tight seal for fastener penetrations, available in two thicknesses: 1/8” (3mm), 1/4” (6mm).

Reference individual data sheets for comprehensive information.
**Installation**

**STORAGE AND HANDLING**
Store materials on end in original packaging at temperatures between 40°F and 120°F (4.4°C and 48.9°C). Protect materials from direct sunlight and inclement weather until ready for use.

**SAFETY**
Persons who access any roofs, involved with roof construction, repair or maintenance shall use appropriate personal protective equipment including, but not limited to, hard hats, eye protection, and leather gloves and must be trained on safe practices relevant to their work.

Where the use of ladders, scaffolds, platforms, or temporary floors are utilized, safety lines and safety harnesses shall be used. Please access the OSHA Web site at www.osha.gov, contact your local OSHA office, or visit the local federal bookstore to obtain the most current information on OSHA 29 CFR 1926.

**PREPARATION**
All surfaces must be dry, sound, clean, “as new” condition, and free of oil, grease, dirt, excess mortar or other contaminants detrimental to the adhesion of the roofing underlayment and flashings. Fill voids and gaps in substrate greater than ½” (12.7 mm) in width to provide an even surface.

**BEST PRACTICE INSTALLATION**
Install SlopeShield Plus Self-Adhered roofing underlayment and related accessories according to manufacturer’s separate written installation instructions. All overlaps must be a minimum of 3” (8 cm) on horizontal seams. Shingled laps are required. See www.VaproShield.com.

**LIMITATIONS**
SlopeShield Plus Self-Adhered should be covered within 180 (6 months) of installation with permanent roofing material.

SlopeShield Plus Self-Adhered Roofing Underlayment Sheet is not intended to be the primary liquid water hold out system or temporary roof covering. Cover membrane as soon as practical.

Minimum recommended application temperature of 20˚F (-6.0˚C) and rising.

**Availability**
VaproShield products are available throughout North America, Central and South America, and New Zealand.

**Warranty**
A 20-year material warranty is available.
