OVERVIEW

A leading manufacturer of sustainable building envelope technology, ATAS utilizes cool pigment paint on many color offerings. Our products reflect infrared radiation, which results in cooler surface temperatures, and maximum fade resistance.

Many of the ATAS products meet the qualifications for potential green building certification credits and industry ratings. See page four, Color vs. Materials Reference Guide, for SRI values. Information on ATAS' sustainable products can be found at www.atas.com/sustainability.

70% PVDF finish carries a limited warranty against fading and chalking. ATAS coated materials are non-staining and virtually maintenance free. Any surface residue is easily removed with conventional cleaning solutions or detergents.

AVAILABILITY

- · All stock colors available in 24 ga, 0.032, 0.040, and 0.050 with limited availability in 22 ga, 0.063 and 0.080.
- · All matte and premium colors available in 24 ga, 0.032, and 0.040 with limited availability in 0.050, and 0.063.

Please inquire for additional materials and custom colors. For additional color offerings, visit www.atas.com/colors.
